# Options - D03 High Flow Parallel Manifold Flange Ports

ISOLATIONS		
Daman isolation options allow a manifold to have two independent pressure and/or tank ports. Isolations are drilled rather than plugged to ensure a leakproof and failproof isolation.		
Ordering code letter:	* Isolation is between stations:	Available # of stations:
A	01 & 02	02-08
B	02 & 03	03-08
C	03 & 04	04-08
D	04 & 05	05-08
E	05 & 06	06-08
F	06 & 07	07-08
G	07 & 08	08

- \* Stations are numbered left to right.
- NOTES:**
- 1) The GA port is not available when a pressure isolation is located between stations 1 & 2.
  - 2) Some cavity and isolation combinations are not possible. Consult factory to determine availability.
